Junior Java Developer

Northstar Labs - fictional employer

Dhaka, Bangladesh | Full-time | On-site

Salary: BDT 30,000-50,000 per month **Category:** Software

ABOUT THE ROLE

Build small Java applications and maintain SQL-backed features with a supportive fictional software team. This opening is designed for testing SmartHire's circular upload, requirement suggestions and reviewed-CV matching.

QUALIFICATIONS AND SKILLS

Education: Bachelor in Computer Science

Technical skills: Java and SQL. Java is required for this demo role.

Soft skills: Communication and teamwork.

Experience: Fresh graduates are welcome. No previous employment is required.

Project evidence: A student or personal project using Java and SQL is preferred.

Certification: Demo Java Foundations Certificate

The certificate is optional. It is a fictional demonstration credential, not a real accreditation.

RESPONSIBILITIES

- Implement and test small Java features.
- Write basic SQL queries and document changes.
- Discuss tasks clearly and collaborate with teammates.

HOW TO APPLY IN THIS DEMO

Use SmartHire to review your CV, open the matching job and submit an application. Recruiters should confirm all structured requirements and mandatory flags before requesting admin approval.

Fictional sample only. No real vacancy, employer, certificate or application destination.
